***Election/Restrictions***

Applicant's election of Group II, claims 7-9 in the reply filed on February 14, 2005 is acknowledged. Because applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)).

Claims 7-9 are objected to under 37 CFR 1.75(c), as being of improper dependent form for failing to further limit the subject matter of a previous claim. Applicant is required to cancel the claim(s), or amend the claim(s) to place the claim(s) in proper dependent form, or rewrite the claim(s) in independent form. Claims 7 and 8 and claim 9 that depends from claim 7 are dependent upon withdrawn base Claim 1 which was not elected. It is suggested that the applicants rewrite Claim 7 to include the limitations of the withdrawn base claim 1.

***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 7-9 are rejected under 35 U.S.C. 102(b) as being anticipated by Nishikawa et al (USP 5,276,132).

Nishikawa et al (USP 5,276,132) discloses a liquid crystal aligning agent and aligning agent applied liquid crystal display device, wherein the liquid crystal aligning agent contains a polymer selected from the group consisting of a polyamic acid having steroidal skeleton and an imidized product thereof that anticipates the claimed invention.

See abstract; cols. 2-7; the examples and the claims.

***Prior Art***

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Chu et al is cited to show the state of the art of aromatic diamine derivatives and the preparation thereof and alignment film materials containing same and LCD cell.
